Your family means the world to you, and you feel the pressure from many sides (work, ministry, finances, etc.) to perform and be productive.

It makes you feel overwhelmed, even stuck at times, and you tell yourself "It is that all there is to life", "If only I had more time", "If only I could go back in time", or "I wish I had clarity on what God wants me to do next".

If this sounds like you, then Story-Based Productivity is your answer.

I love what Moses says in Psalm 90:12, "Teach us to realize the brevity of life, so that we may grow in wisdom."

Very smart and resourceful and fast service provider. I couldn't even keep up with his speed to the point where I was actually slowing him down, yet the work was always excellent. He communicates well and you don't need to explain in lengthy ways before he catches the essence of what you need.

FREQUENTLY ASKED QUESTIONS

Q: What is the difference between a 100% and a 100%+ loan?

A: A 100% loan is a loan that is 100% of the purchase price. A 100%+ loan is a loan that is more than 100% of the purchase price. This means that the borrower is borrowing more than the purchase price of the property. This is typically done to cover closing costs, taxes, and other fees. The borrower will need to provide a larger down payment for a 100%+ loan.

Q: Can I use my 401(k) to pay for my down payment?

A: Yes, you can use your 401(k) to pay for your down payment. This is known as a 401(k) loan. You will need to borrow the money from your 401(k) account and pay it back to yourself over time. The interest rate on the loan is typically the prime rate plus 1%. You will need to make payments on the loan each month. If you fail to make payments, the loan will be considered a distribution and you will have to pay taxes and penalties on the money.

Q: What is the difference between a 30-year and a 15-year mortgage?

A: A 30-year mortgage is a mortgage that is repaid over 30 years. A 15-year mortgage is a mortgage that is repaid over 15 years. The main difference between the two is the interest rate. A 15-year mortgage typically has a lower interest rate than a 30-year mortgage. This means that you will pay less in interest over the life of the loan. However, you will also need to make larger monthly payments on a 15-year mortgage.

Q: Can I get a mortgage with a bad credit score?

A: It is possible to get a mortgage with a bad credit score, but it will be more difficult. Lenders will typically look for a credit score of 620 or higher. If you have a credit score below 620, you may need to provide a larger down payment or a co-signer. You may also be able to get a mortgage with a bad credit score if you have a good job and a stable income.

Q: What is the difference between a fixed-rate and an adjustable-rate mortgage?

A: A fixed-rate mortgage is a mortgage with a fixed interest rate. This means that the interest rate will stay the same for the entire term of the loan. An adjustable-rate mortgage (ARM) is a mortgage with an interest rate that can change. The interest rate on an ARM is typically lower than the interest rate on a fixed-rate mortgage. However, the interest rate can increase over time, which means that your monthly payments could increase.

A: It is possible to get a mortgage with a high debt-to-income ratio, but it will be more difficult. Lenders typically look for a debt-to-income ratio of 43% or lower. If you have a debt-to-income ratio above 43%, you may need to provide a larger down payment or a co-signer. You may also be able to get a mortgage with a high debt-to-income ratio if you have a good job and a stable income.

The main difference between the two is the down payment requirement. A conventional loan typically requires a down payment of 3% to 20%. An FHA loan typically requires a down payment of 3.5%.

Q: Can I get a mortgage with a high credit score?

A: Yes, you can get a mortgage with a high credit score. A high credit score typically results in a lower interest rate. This means that you will pay less in interest over the life of the loan. You may also be able to get a mortgage with a high credit score if you have a good job and a stable income.

Q: What is the difference between a 15-year and a 30-year mortgage?

A: A 15-year mortgage is a mortgage that is repaid over 15 years. A 30-year mortgage is a mortgage that is repaid over 30 years. The main difference between the two is the interest rate. A 15-year mortgage typically has a lower interest rate than a 30-year mortgage. This means that you will pay less in interest over the life of the loan. However, you will also need to make larger monthly payments on a 15-year mortgage.

Q: Can I get a mortgage with a low credit score?

A: It is possible to get a mortgage with a low credit score, but it will be more difficult. Lenders typically look for a credit score of 620 or higher. If you have a credit score below 620, you may need to provide a larger down payment or a co-signer. You may also be able to get a mortgage with a low credit score if you have a good job and a stable income.
